

DEZIM RDS PLUGIN

Introduction:

The plugin generates tokens for every survey participant who fill the survey. This process continues for every participant who wants to invite more participants. The plugin works only for close surveys.

The survey attributes need to be set before.

Add/delete survey participant attributes

There are 5 user attribute fields in this survey participants table.

Number of attribute fields to add:

INSTALLATION:

- Activate the plugin at the Lime survey plugin manager (requires proper user rights for accessing the feature at the Lime survey admin interface).
- Plugin only works for the close surveys having the token table.
- Lime survey 5.x: Just upload the ZIP file at the plugin manager to install the plugin.
- Lime survey 3.x: Unzip all files. Then copy the “Rds.” folder to the Lime survey “plugins” directory.
